ILLUSTRATION DIAGRAM

FEATURES

1. 2 x Built-in fan for better efficiency
2. No harmful chemicals or toxic needed
3. Safe for human and pets
4. Powerful UVA Light to attract insects
5. Low power consumption of 25 watts
6. Collection tray with cleaning brush
7. Small, light and portable
8. Coverage area of 500sq ft

HOW IT WORKS

Pest-Stop professional ultimate mosquito and flying insect killer attract the flying insects such as flies, moths, mosquitoes, and other flying insects via the powerful UVA black light. The electrically charged, high voltage metal grids will instantly eliminate the insects.

Special designed black light tube (UVA rays) is harmless to human and pets. The built in dual suction fan quickly draws in the flying insects and eliminating them. The ultimate mosquito and flying insect killer also comes with a safety outer mesh to prevent contact to the grids.

INSTALLATION GUIDE**Turning on the unit**

1. Plug power socket of insect killer directly to the wall socket.
2. Switch 'ON' the power switch
3. UVA light lit up while the fan will start spinning once unit is in operation.

Replacing the UV lamp

1. Ensure that the unit is power off.
2. Remove the screw from the front plastic cover.
3. Replace the UV Lamp
4. Put the plastic cover back in place
5. Fasten back the screws

Cleaning up the debris of the flying insects

1. Press the bottom clasp to remove the tray from the bottom of the unit
2. Dispose the debris of the flying insects with the brush provided.
3. Wash and dry the removeable tray thoroughly.
4. Secure the tray back into the unit.

SAFETY PRECAUTION

1. Always turn the power off before cleaning or changing the UV lamp.
2. Do not touch the internal high voltage grids when in operation to prevent electric shock.
3. Do not attempt putting metal objects inside the grids.
4. The appliance is intended for indoor use only.
5. Do not place unit near flammable vapors or explosive dust.
6. Never remove any fixed part of the appliance to make any internal adjustments to prevent electric shock.
7. Do not operate the unit if the supply cord or any other parts of the appliance is damaged.
8. Unplug the appliance before cleaning.
9. Use suitable brush to clean the high voltage metal grid and throw away the debris of the insects weekly.
10. No touching of the high voltage grid by finger or any metal pieces.
11. Do not wash unit or place it under rain.
12. Repairs should be carried out by manufacturer or qualified electricians.
13. Keep out of reach from children.
14. Not meant to operate for 24 hours.

FREQUENTLY ASKED QUESTIONS

- Q1) Will the ultimate mosquito and flying insect killer be harmful to human and pets?
Ans : It is completely safe for humans, animals and friendly to the environment. The electronic mosquito and flying trap killer does not involve fogging, pesticides, coils and citronella. Other forms of control often involve the use of chemicals that have the potential to be dangerous for both humans and the environment.
- Q2) How high off the ground should I place the unit?
Ans : It is more efficient when placed approximately 1 - 2 meters off the ground. The ultimate electronic mosquito and flying insect killer should be protected from weather and moisture.
- Q3) Is the ultimate mosquito and flying insect killer noisy?
Ans : The fan when spinning is the only sound that the ultimate mosquito and flying insect killer will produce. This spinning sound is equivalent to that of the computer fan.
- Q4) How does it attract other insects?
Ans : It has been specifically designed to attract and control mosquitoes as well as the flying insects via the UVA Lamp. The UV Lamp emits UVA rays with wavelength around 365nm which proved to be most effective in attracting insects.
