

## Hi-Pon 40-04 Epoxy Coating

Hi-Pon 40-04 is a two-component, amine-adduct cured epoxy coating for use on non-exposed steel and cement surfaces where a chemical-, oil- and abrasion-resistant coating is required. It works by forming a protective barrier over the coated surface, thus keeping out corrosion agents like moisture and chloride salts, and thereby prolonging the service life of the coated surface.

### Characteristics

### Commonly Specified System

<b>Resin</b>	Epoxy	
<b>Type</b>	Solvent-based	
<b>Finishing</b>	High Gloss	
<b>Application</b>	Roller, Brush, Airless Spray	
<b>Painting System</b>	<b>4-coat System – Mild Steel</b>	<b>3-coat Non-ferrous and Galvanized</b>
	1 coat Hi-Pon 20-07 Zinc Phosphate Primer	1 coat Hi-Pon 20-03 Epoxy Primer
	1 coat Hi-Pon 30-03 Epoxy Midcoat	2 coats Hi-Pon 40-04 Epoxy Coating
	1 to 2 coat(s) Hi-Pon 40-04 Epoxy Coating
